

Nicholas Jones

PROFESSIONAL SUMMARY

Software Developer with a Bachelors in Software Engineering from Miami University. My college experience and individual study has given me programming experience in languages such as Java, C++, HTML and SQL. FedEx provided me with valuable communication and teamwork skills in large teams. My senior capstone project introduced me to Agile and communication within small teams, as well as the Blazor framework. FastTrack graduate with a focus on Spring, Java and Angular.

TECHNICAL SKILLS

Programming: Java, JavaScript, Angular, TypeScript, HTML5, CSS3, SQL, Spring, Spring Boot, JDBC, Jackson, JPA, jQuery, Node, webpack, Babel, Maven, npm, C++, C#
Software: Eclipse, VS Code, Git, GitHub, cmd, pgAdmin, Visual Studio
Databases: PostgreSQL, MySQL
Operating Systems: Windows

PROFESSIONAL EXPERIENCE

COOK SYSTEMS – Memphis, TN
FastTrack Developer

06/24 – Present

Social Media API

- Ensured progress by coordinating with a team of 2 other individuals in daily meetings
- Created efficient work by preparing project infrastructure, including entities, repositories, mappers, and dto's
- Exercised separation of user and code by utilizing Onion architecture where we developed a controller interface for the services implementation.
- Programmed a social media API for tweets, users, and hashtags through the use of Restful API endpoints.

Environment: Java, Spring, PostgreSQL

- B
- C
- D

Environment:

FedEx Ground – Vandalia, OH

05/19 – 08/19

Package Handler

- Ensured safety within the warehouse by adhering to all regulations regarding Hazardous materials and the cleanliness and maintenance of the warehouse.
- Maximized loading efficiency by coordinating with a large team of 30+ members.
- Reduced probability of injury by cooperating with other team members in team lifts for packages greater than 100lbs.
- Improved scanning efficiency by tracking productivity numbers.

PERSONAL PROJECTS

Course Planner Senior Capstone Project

08/22 – 05/23

- Enhanced students organization by creating a website that allows students to plan out their 4/5 year degree
- Assured quality by following the Agile methodology, meeting with the client on a bi-weekly basis
- Wrote seamless and clear code by utilizing the front-end framework Blazor, combining HTML and C#
- Organized a consistent schedule as Scrum Master by maintaining the issue board and keeping the group focused during meetings

Environment: HTML5, CSS3, Blazor, C#, MySQL
