PROFESSIONAL SUMMARY

Nicholas Jones is a Full-Stack Software Developer with a Bachelors in Software Engineering from Miami University. His college education and individual study provided programming experience in languages such as Java, C++, HTML and SQL. Working at FedEx helped him develop valuable communication and teamwork skills in large teams. The senior capstone project introduced Agile and improved communication within small teams, as well as the Blazor framework. Nicholas is well prepared for any job with skills in full stack development.

TECHNICAL SKILLS

Programming: Java, JavaScript, Angular, TypeScript, HTML5, CSS3, SQL, Spring, Spring Boot, JDBC, Jackson, JPA, jQuery, Node, webpack, Babel, Maven, npm, C++, C#
Software: Eclipse, VS Code, Git, GitHub, cmdr, pgAdmin, Visual Studio
Databases: PostgreSQL, MySQL
Operating Systems: Windows

PROFESSIONAL EXPERIENCE

COOK SYSTEMS – Memphis, TN
FastTrack Developer

06/24 – 08/24

Social Media API

- Programmed a social media API for tweets, users, and hashtags through the use of Restful API endpoints.
- Ensured progress by coordinating with a team of 2 other individuals in daily meetings
- Created efficient work by preparing project infrastructure, including entities, repositories, mappers, and dto's
- Exercised separation of user and code by utilizing Onion architecture where we developed a controller interface for the services implementation.

Environment: Java, Spring, Spring Boot, PostgreSQL, JDBC, Maven, Jackson, JPA

Who's Who Game

- Created a fun game that allows players to guess the artist of a song given a small preview of the song.
- Reinforced an efficient web design through the use of the Angular framework.
- Established coherency by utilizing local storage and observables to persist data through state changes.
- Tracked users skills via a leaderboard system, created with Angular's dynamic variable binding.

Environment: HTML, CSS, TypeScript, Angular, npm, babel

Cooksys Final Project (Full stack company application)

- Simulated a company's employee web application through the use of full stack software development.
- Stored user information and company announcements via a postgresQL database back-end.
- Ensured an efficient and clear user interface with the user of the Angular's components and dynamic state management.
- Secured company information by utilizing a login system with username and password for each employee.

Environment: HTML5, CSS3, TypeScript, Angular, npm, babel, Java, Spring, Spring Boot, PostgreSQL, JDBC, Maven, Jackson, JPA

PERSONAL PROJECTS

Course Planner Senior Capstone Project

08/22 – 05/23

- Enhanced students organization by creating a website that allows students to plan out their 4/5 year degree
- Assured quality by following the Agile methodology, meeting with the client on a bi-weekly basis
- Enabled a responsive web application between HTML and C# variables through data binding.
- Provided a smooth user experience with C# asynchronous methods to process user input.
- Organized a consistent schedule as Scrum Master by maintaining the issue board and keeping the group focused during meetings

Environment: C#, HTML5, CSS3, Blazor, MySQL

FedEx Ground – Vandalia, OH

05/19 – 08/19

Package Handler

- Ensured safety within the warehouse by adhering to all regulations regarding Hazardous materials and the cleanliness and maintenance of the warehouse.
- Maximized loading efficiency through coordination with a large team of 30+ members.
- Reduced probability of injury by cooperating with other team members in team lifts for packages greater than 100lbs.
- Improved scanning efficiency via tracking productivity numbers.

EDUCATION

Cook Systems FastTrack Java Program – Memphis, TN

06/24 – 08/24

Concentrated Java Frameworks and developer tools training

Miami University – Oxford, OH

08/19 – 05/23

Bachelor of Science: Software Engineering
